Hello fellow Corvair enthusiast,

February 15, 1979

Thanks to your continued support, American Corvair Parts, Inc. is continuing to grow. We have added many new parts to this new catalog, which we hope will be of help in restoring and/or operating your Corvairs. We still have the largest selection of NOS accessories in the country. Our selection of chrome trim and emblems is astounding and our parts inventory is still growing. We are also actively remanufacturing many parts for your favorite car.

Our aim is to provide the most complete source for items you need to make your car as good looking as possible. Please remember that parts are getting more and more scarce, so start putting away extras now for that "dream car" you're still looking for. Rollo and I are both working full-time to bring you parts. Your help and support keeps us going.

Now, a quick word about our policies:

1. Orders received by 12 noon (our time) can usually be shipped the same day.
2. Postage and insurance are extra on all orders. Our base rate is 10% of your total order with a minimum of \$1.50. Overages will be refunded and you will be billed for any excess. All orders are shipped via UPS unless you request otherwise. Orders over \$250.00 shipped prepaid.
3. Kentucky residents, please add 5% state sales tax.
4. Prices from GM are going crazy; therefore we must reserve the right to change prices without prior notification.
5. Unless otherwise requested, orders for out-of-stock items will be held until we can deliver. If you prefer an immediate refund, just let us know. Credit slips will be issued for all overages unless a refund is requested.
6. We need inventory. Let us know what you have for sale.
7. Personalized Gift Certificates are available for any occasion.
8. RETURNS: All items are guaranteed as advertised and may be returned for any reason within 30 days. Any returns made after 30 days will be subject to a 15% handling charge. Electrical parts are not returnable after 10 days. Please return all parts in their original boxes.
9. If you have a question or just need information, please include a SASE.
10. DAMAGED GOODS: Almost all of the packages we ship arrive on time without any damage. However, every now and then, a package is damaged in shipment. If you receive a shipment that has been damaged PLEASE contact the carrier that delivered the package at once. Once a package leaves our shop via a regulated carrier (UPS, Bus, etc.) we have no control over it. YOU must contact the carrier as they are responsible for the damage. DO NOT destroy the box in which the parts arrived. The carrier will inspect the damaged merchandise and then instruct us on how to proceed. DO NOT return a damaged package to us without first notifying the carrier and securing our permission to return the package, or we may not be able to replace the damaged parts. For any other non-damaged returns, please contact us first.
11. You will find the following abbreviations in our catalog:

F.C. = Forward Control vehicles. (Corvans, Greenbriers, etc.)  
S.W. = Station wagon  
P.G. = Powerglide transmission  
A/C = Air conditioning.  
AIR = Air injection reactor. (Smog pump).  
Conv. = Convertible.  
Right side = Passenger side  
Left side = Drivers side  
NOS = New old stock  
I.D. = Inside diameter  
O.D. = Outside diameter.

12. If you receive a bill with your order, please pay it within 10 days.

That's it! Now jump into our "goodie list" and find the parts you need. If you plan to be in the Louisville area, give us a call and stop by. Our coffee pot is always on. We'll give you the grand tour of our parts department!

Sincerely,

*Rollo & Colleen*

Rollo and Colleen Fox

P.S. We'll be happy to deliver parts to any of the shows or conventions we attend.

Master Charge and VISA now accepted. Minimum order \$25.00.

A picture tour tells you what our business is like - a unique inside look at American Corvair Parts and the people who run it.

On more mornings than they care to count, Heidi and Colleen are off at the crack of dawn to search for hoards of NOS parts and accessories hidden away in the backwoods of America. (Colleen usually drives!). And you thought we just ordered all of these parts from GM! Heidi and Colleen traveled more than 50,000 miles last year seeking out parts and attending shows and conventions.

Meanwhile back at the ranch . . . Rollo and Gretchen answer the phone, wrap orders and try to sort through all the parts Colleen brought home from the last hunting trip.

Visitors are always welcome to stop by; however, please call first so we can let Heidi and Gretchen know that "friends" are coming by. They don't take too kindly to unannounced strangers. So, if you're in the Louisville area, give us a call and come by. The coffee pot is always on.

We love all of you. Thanks for all your support. We are really growing fast now, so if any of our new "rules" don't sit right, give us a call and let's talk. We're working hard - full time - for you. Send us an order - give us a try - and see why American Corvair Parts is where our customers send their friends.

Last year we set up at more than 20 conventions and swap meets so you could see what you were buying. Heidi especially loves the shows - everyone manages to slip her a few "goodies". (She is asleep under the truck - guarding those precious parts!).

We work hard to make sure that most orders go out within 48 hours with the exact parts you ordered. However, even the best of us make little mistakes now and then. So, if by chance, you find one of our youngin's in your order, just throw her a milk bone (quickly) and ship her on back!

## TOPICAL INDEX TO THE SECTIONS

- A** - stands for accessories. These are the extra little "goodies" that dress up your car and make it more comfortable to live with. All items are guaranteed authentic. No where else in the country - NO WHERE ELSE - will you find such a large selection of original Corvair accessories.
- C** - stands for chrome. Here you will find bright mouldings, emblems, bumpers, sill plates and even chrome plated ash trays. Almost anything with a bright or shiny finish will be in the chrome section.
- P** - stands for parts. Mainly mechanical parts or trim items that are not bright or chrome plated will be found here. Our "P" section is somewhat of a catch all. If what you are looking for is not an accessory, a chrome plated or shiny part, interior parts or books you'll probably find it in the "P" section.
- I** - stands for interior parts. Our newest and surely most interesting section. Here you'll find all the items we have to help you restore the inside of your favorite 'Vair. This will also be one of our fastest growing sections in the months to come.
- M** - stands for miscellaneous. Everyone has to have a miscellaneous section! Where else would one put books, cleaners, tools, etc.?
- D** stands for decals. All of our decals are faithfully reproduced just like the originals. If the original was on paper, then our reproduction will be on paper - not vinyl.

PLEASE NOTE: Parts are grouped within each of our topical sections in alphabetical order (more or less). Therefore, if you're looking for a brake part - look in the "P" section between boots (as in spark plug) and bumpers.

We hope our "simple-minded" approach to the over-complicated auto parts business will help you find the parts you need. If all else fails, just give us a call and describe what you need. We don't have a bunch of robots answering the phone that don't know a cable from a piston without first getting the part number!

("R" in combination with "A", "C" or "P" in a part number denotes a reproduced part or a replacement part not made by GM).

**A095 ARM REST BASES.** New front bases. Pads are not included. See A100 for pads.

A095-1 1960-64 14.00

NEW chrome appearance front arm rest base. You'll be amazed at how much new bases will brighten up your favorite 'Vair's interior. Take a look at your old ones. If the white plastic is showing through where the "chrome" has worn off, it's time to replace them.

A095-3 1965-67 12.50

NEW chrome appearance front arm rest base. These bases are an exact reproduction on the original GM bases. However, we used a much stronger plastic - cycolac - than GM's styrene and a much better plating process. A must for any 1965-67 model.

\*\*\*\*\*

**RECOVERED PADS.** All pads are professionally recovered right in our trim shop with the correct vinyls. We must ask you to send in your old pads for recovering as we have not been able to locate a source for the pads themselves. We'll recover your old pads with the correct vinyl (crush grain for earlies or Madrid grain for lates). We can match almost any GM color! However, if color is critical, send a SASE for a color sample. Remember - we must have your old pads intact, do not strip the old vinyl off. We'll make them look just like new!

AR100-3	60-64	Front pad. Available in red, black, white, light blue, aqua, dark blue, saddle or fawn. (Be sure to specify color when ordering).	3.75
AR100-4	1965-67	Front pad. Available in black, red, white, light blue, saddle, fawn, dark blue, aqua or cream. (Be sure to specify color when ordering).	3.75

\*\*\*\*\*

AR220-3	65-67	2-door. These sets include two guards and attaching clips. They were remanufactured at our request by the same company that made them for GM. They were produced from the exact same tooling as were the originals.	12.00
AR220-5	68-69	2-door. These sets include the two door edge guards. (Clips were not used in these years). These, too, were remanufactured at our request by the original manufacturer exclusively for "ACP" and our authorized distributors. Don't be fooled by "one size fits all" door edge guards. The 1965-67 style is not stock for 1968-69.	12.00

\*\*\*\*\*

A235 FLOOR MATS. These are the original GM rubber accessory mats used to protect your carpets.			
A235-1	60-64	Full width front. Fawn, gold or aqua.	12.00

Availability of new old stock (NOS) accessories varies from month to month and, on some of the more rare items, from day to day. Most Corvair accessories are very rare. We at American Corvair Parts, Inc. work harder than any other dealer, large or small, to provide you with the best selection of NOS accessories available anywhere.

During the last 2 years we've rolled up over 100,000 miles on our Van, spent countless nights in motel rooms during "hunting trips" and battled stubborn and obstinate parts men who made us buy a ton of junk to get a handful of the "goodies" all in the search for accessories for your car.

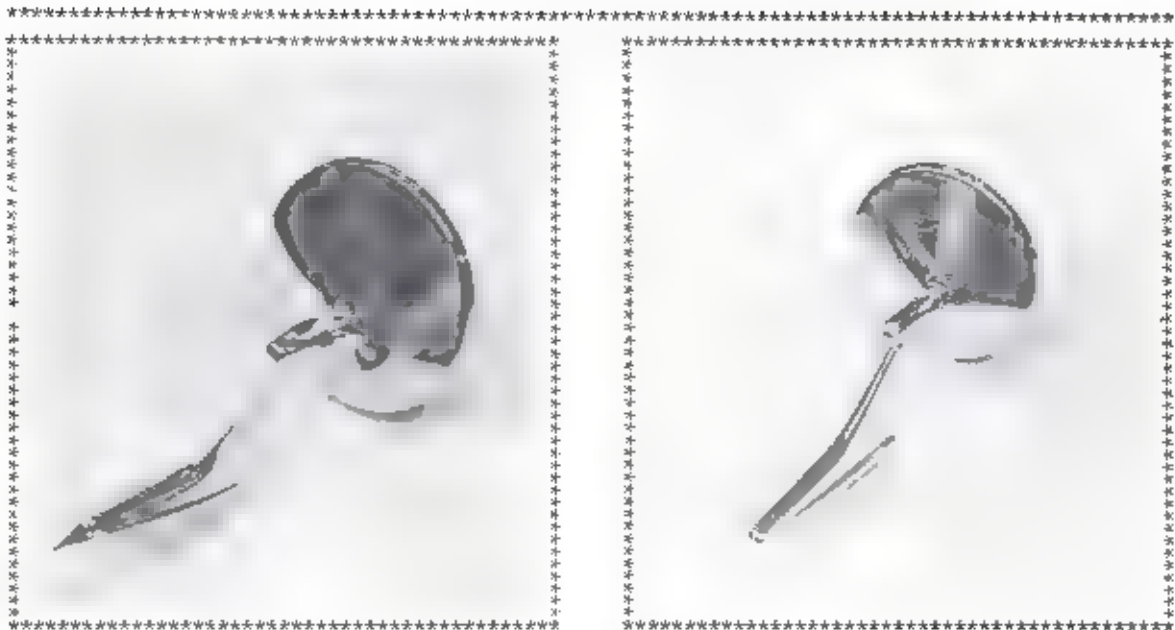

But the supply of accessories is dwindling quickly. In one 2-day stretch last summer, Colleen drove over 500 miles and stopped at 18 Chevrolet dealers to buy 1 set of floor mats! So, our advice is, don't delay. Buy your accessories while they are still available. Some items like bumper guards, floor mats and locking gas caps will probably never be reproduced due to prohibitive tooling charges. We'll keep the rare accessories available as long as the wheels stay on our Van. If you have a few items squirreled away you want to sell, please send us a list with your asking price in the first letter. The parts will go to your fellow collectors.

WHAT IS STOCK? We constantly hear from "experts" that one part or another is not correct for their car. Or, conversely, that a part manufactured by GM for use on a Chevy II or a Chevelle is just what came on their car from the factory. And so on and so forth. Back in the '60's most accessories were DEALER installed, not installed at the factory. Each Chevrolet dealer had to buy so many dollars worth of accessories for each new car he ordered. This led to two large abuses of "stock" as we all use the term. First, many dealers loaded up a car with any accessories they had on the shelf, whether they were "stock" or not. In some cases, accessories which were made for other Chevrolets - Impalas, Chevelles, Chevy II - were installed on Corvairs and sold with these "mismatched" accessories. Second, since dealers were virtually stuck with any accessories they had left at the end of a model year, many smart parts men installed leftover 1965 accessories on their new 1966 cars. Add to this the mess created by the literature GM had printed. GM, in many cases, used leftover sales literature which was created by advertising firms that cared nothing about whether or not the pictures they used depicted actual "stock" parts and accessories. So, what is stock? Stock, as generally accepted by most of us, is a part that matches a part number that appears in a Chevrolet parts book from the same year as the part in question. As an example, to determine the "stock" tail light lens used on 1966 models, one must consult a 1966 parts book. The 1974 reprint shows only the lens which is now available which works fine but is not "stock". Be wary of sales literature and friends' accounts of what was on their car. Odds are they never thought about either of our two points when they took delivery on their car.

Boy, have we grown! Rollo and I started all of this with \$20.00 on our way to the National Convention in Chicago in 1974. We now stock over 2200 parts and have over \$100,000.00 in inventory in stock at all times. It's been hard work, but with your help we're going to get even bigger! THANKS

## INTERIORS

"I" means Interiors from "ACP". We're introducing a new section in our 1979 catalog dedicated to the interior of your Corvair. Look in this section for carpets, kick panels, arm rest bases and pads, convertible top boots, headliners, rear package shelves, etc. Some of these items are listed elsewhere in the catalog, but we thought you'd enjoy seeing everything together in this special section.

**A095 ARM REST BASES.** New front bases. Pads are not included. See A100 for pads

A095-1 1960-64 14.00

NEW chrome appearance front arm rest base. You'll be amazed at how much new bases will brighten up your favorite Vair's interior. Take a look at your old ones. If the white plastic is showing through where the "chrome" has worn off, it's time to replace them.

AR095-3 1965-67 12.50

NEW chrome appearance front arm rest base. These bases are an exact reproduction on the original GM bases. However, we used a much stronger plastic - cycloc - than GM's styrene and a much better plating process. A must for any 1965-67 model.

**RECOVERED PADS** All pads are professionally recovered right in our trim shop with the correct vinyls. We must ask you to send in your old pads for recovering as we have not been able to locate a source for the pads themselves. We'll recover your old pads with the correct vinyl (crush grain for earlies or madrid grain for lates). We can match almost any GM color! However, if color is critical, send a SASE for a color sample. Remember - we must have your old pads intact, do not strip the old vinyl off. We'll make them look just like new.

AR100-3	60-64	Front pad. Available in red, black, white, light blue, aqua, dark blue, saddle or fawn. (Be sure to specify color when ordering).	3.75
AR100-4	1965-67	Front pad. Available in black, red, white, light blue, saddle, fawn, dark blue, aqua or cream. (Be sure to specify color when ordering).	3.75
AR100-5	68-69	Front pad. Available in black, dark blue or green. (Be sure to specify color when ordering).	3.75
AR100-6	60-64	Rear pad. Available in the same colors as A100-3.	3.75
AR100-7	65-67	Rear pad. Available in the same colors as A100-4.	3.75

## CARPETS

(Sewn carpets). There is an art to making a set of carpets just as there is an art to tailoring a good suit. It's not an art one masters with good intentions - it is an art one gains with experience. When "ACP" decided to make carpets for your Corvair we went out and found an experienced trimmer (that's trade ingo for an auto upholstery man). He brought to our new venture 10 years of full time experience in making and installing auto carpets, headliners, etc. We added to this a \$2000.00 sewing machine, the best carpet from the Georgia carpet mills and top quality automotive padding, binding and heel pads. Our sewn carpets are the best you can buy anywhere at any price. We've taken our carpets to shows all over the country and our customers agree - nobody else makes a set of carpets with the skill of "ACP".

NOTE. Carpet sets are also available for 1964-70 Chevelles, 1962-67 passenger cars and 1962-69 Chevy II's. Write for further information.

I150 CARPETS. (Molded carpets). After we established ourselves as the finest makers of sewn carpets we didn't just sit back and crow. Some Corvair owners wanted molded carpets for their late model Corvairs. So we went out and found the manufacturer to produce perfect molded carpets! Original materials! Original molds! Original process! SHOW QUALITY and reasonable cost. (Expect only the best from "ACP").

I150-1	65-69	Molded carpet sets. Please specify year, model, type of seats and color of carpet desired.	85 00

I200 CONVERTIBLE TOP BOOTS. What can we say? A convertible top boot is one of the most complicated trim parts on an automobile. There are over 19 pieces in a top boot. Each piece is precisely cut from the finest grade vinyls and then carefully fitted together to form a boot every bit as fine as any GM ever made. No extra charge for snaps. No extra charge for pads -- No extra charge for the original boot bag - and No extra charge for "ACP" quality. The final product will be proudly worn by your Corvair in a national concours or in everyday traffic. You can pay more -- you can pay less -- but you can't buy a finer boot for your top.

I200-1	62-64	Top boot	65 00
I200-2	65-69	Top boot	65 00

Top boots are available in black, white, red and saddle (Write for other colors). Be sure to specify color when ordering.

I350 HEADLINERS. All our headliners are prepared in our trim shop and are tailor made for your Corvair. Available in black, white, light blue, red and saddle. Or send us a swatch of your old headliner and we'll match it.

I600 PADDED DASHES. We are working on reproducing completely new padded dashes, but for the time being, recovered dash pads are the best we can offer. We will take your old dash pad and professionally recover it for you. We guarantee a show quality product. Just wrap up your old dash pad and send it to us. Our trim shop will return to you what you'll think is a brand new pad. Please do not send bent pads and DO NOT strip off the old vinyl. Heavily damaged pads may be slightly more expensive.
